Conflict Minerals Policy Statement

SOP-Metal Oy is committed to compliance with the U.S. Securities and Exchange Commission's ("SEC") final rules relating to the implementation of reporting and disclosure requirements with respect to "conflict minerals". Additionally, we expect that our suppliers are also following SEC's rules and support its compliance.

More closely, we are committed to:

- *Support the policies underlying the U.S. legislation relating to the supply of conflict minerals.*
- *Conduct reasonable, risk-based due diligence of our supply chain (and require our suppliers to do the same) using industry accepted templates and other recognized reporting tools.*
- *Develop and implement methodologies for periodically validating smelter and mine adherence to industry norms in conflict minerals compliance.*
- *Upon identification of any sources of supply of conflict minerals that are deemed to be "non-conflict free," to institute remedial action up to and including alternative sourcing from "conflict free" resources.*

—

SOP-Metal produces busbar solutions and other subcontracting products requiring high-level of material know-how for various industries, including the electricity and energy sectors. In addition, we both conduct and isolate electric currents. We can do the whole job from design all the way to manufacturing the components.
